## U.S. EXPORTS OF DRIED FRUIT TOP \$160 MILLION IN 1979

U.S. exports of dried fruit have fluctuated widely in the past 10 years, primarily because of severely weather-reduced crops of raisins and prunes (the major dried fruit items). After slight declines in 1972 and 1973, exports reached a high of 131,148 metric tons in 1976. Since then, exports have declined to the lowest level of the 1970's--only 92,161 tons in 1979. However, despite the reduced output and fluctuating exports, export value climbed steadily throughout the period--from \$52.2 million in 1970 to \$162.9 million in 1979 (a 212 percent increase).

Raisins, the leading export item, were particularly affected by adverse weather conditions in the 1970's. Reduced crops in 1972, 1976, and 1978 resulted in greatly reduced shipments in the following years.

The major markets for U.S. raisins are Japan, Canada, and Western Europe. The European Community (EC) alone took one-fourth of total shipments in the past 5 years. In 1979, the five leading markets--which accounted for nearly 60 percent of total exports--were (with percent of total exports in parentheses): Japan(21), Canada(16), West Germany(9), the United Kingdom(6), and Sweden(6).

Barring further setbacks caused by adverse weather, the outlook is for excellent export opportunities in the next 10 years. Aggressive marketing by industry groups and rising income levels in many countries are factors that should improve and increase exports in the near future.

Prunes, the second largest dried fruit export item, have likewise been affected by severe weather. Exports rose from 35,857 tons in 1970 to 54,328 tons in 1976 and then dropped to only 38,225 tons in 1979.

The leading export markets for dried prunes are the EC, other West European countries, Canada, and Japan. The EC and other West European countries combined have purchased over 70 percent of total exports in the past 5 years. In 1979, the five leading countries (Italy, France, Canada, Denmark, and Japan) took 46 percent of total exports.

The outlook for the next few years is promising, particularly in markets outside Western Europe. Exports to the Far East, the U.S.S.R., and Eastern Europe have increased significantly and are expected to continue to grow in importance.

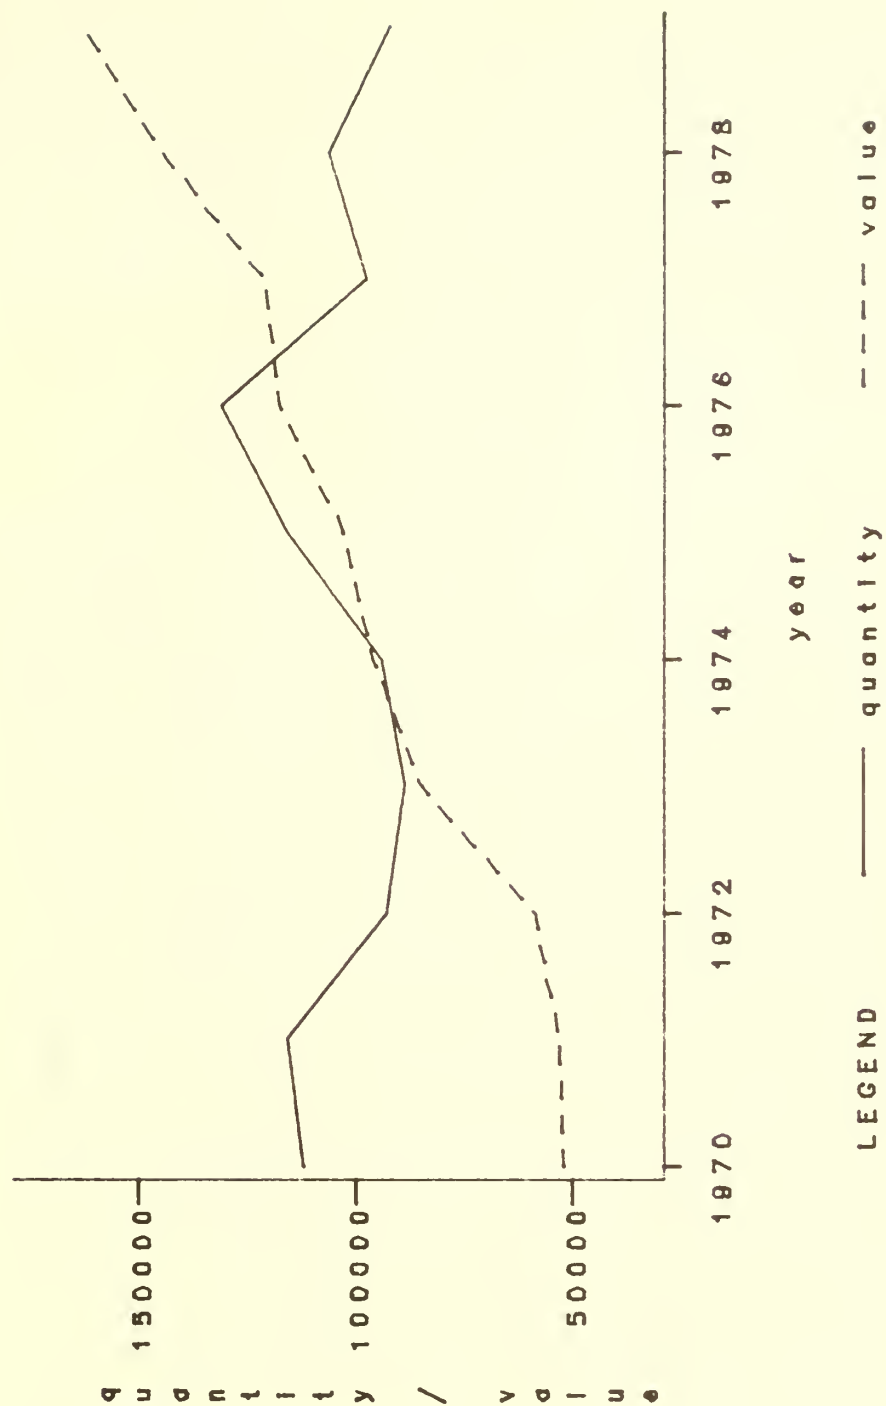

Other dried fruits--principally apples, apricots, peaches, pears, dates, figs, and mixed fruit--have averaged about 11 percent of total dried fruit exports in the past 5 years. In total, exports of these items have increased from \$8.4 million in 1970 to slightly over \$23.0 million in 1979.

\* \* \* \* \*

Quantity data are expressed in metric tons equivalent to 2,204.6 pounds. Dashes in the statistical tables signify that data are either unavailable or not separately classified. The data source is the U.S. Bureau of Census.
